

Stack Overflow Developer survey 2019 Analysis

Huaidong(Ben) Wang

April 14, 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- The survey background and how the data is collected.
- The goal of the survey is to find out what is the:
 - Most desirable language and Databases
 - Most desirable webframe Platforms
- Methodology description.
 - Data gathering.
 - Data analysis.
 - Data visualizations.
- Results presentation supported by charts
- Discussion of overall findings and implications regarding
- Final conclusions of the research.

INTRODUCTION

- Stack Overflow's annual Developer Survey is one of the largest and most comprehensive surveys of software developers around the world. It gathers insights into programming languages, tools, technologies, job preferences, salary trends, etc.
- The purpose of this research is to use this survey data to describe and predict how people are using programming languages, platform, database and frameworks now and in the future.

METHODOLOGY

- Data Source: Stake Overflow Developer Survey 2019
- Data collecting
 - API
 - Web Scraping
 - Dedecated library
- Data cleaning and wrangling with Python.
- Exploratory data analysis
 - Analyzing distribution
 - Handling outliers
 - Determine correlations
- Data visulation
 - Using Python language.
 - Using IBM Cognos
- Final Report

RESULTS

Through the analysis of survey data, we have arrived at clear conclusions regarding several technological trends and current situations in the IT industry. Please follow me to the next slides.

PROGRAMMING LANGUAGE TRENDS

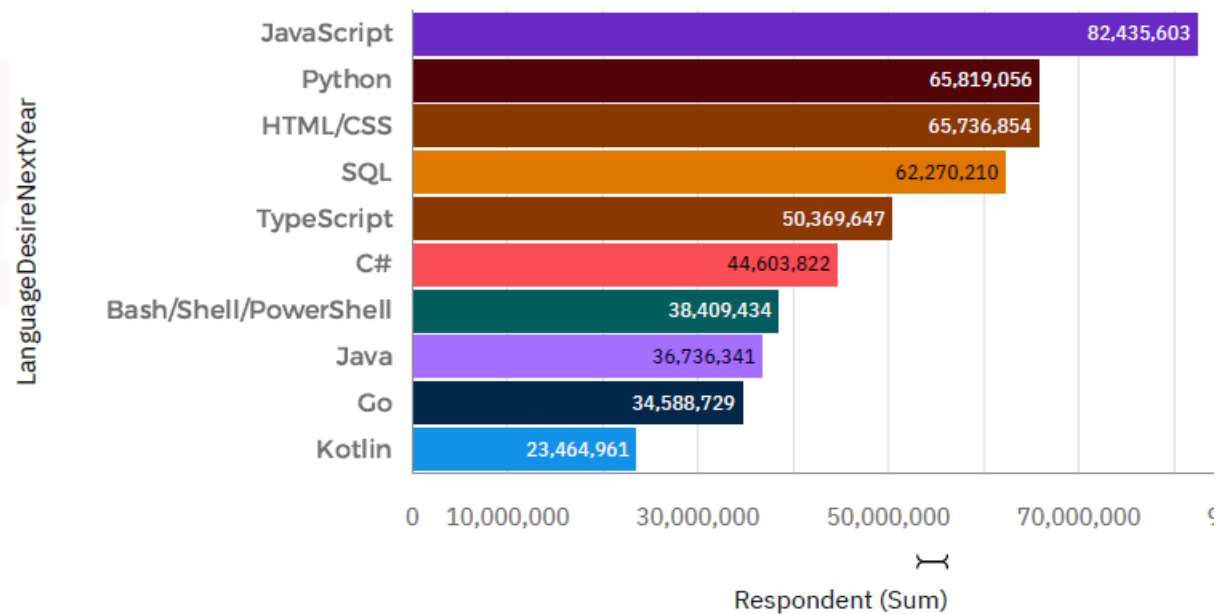

Current Year

Top 10 LanguageWorkedWith

Next Year

Top 10 LanguageDesireNextYear

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript is the most popular programming language in 2019.
- HTML/CSS, SQL are second and third in demand language on the job market.
- Python, TypeScript might jump up to the front next year.

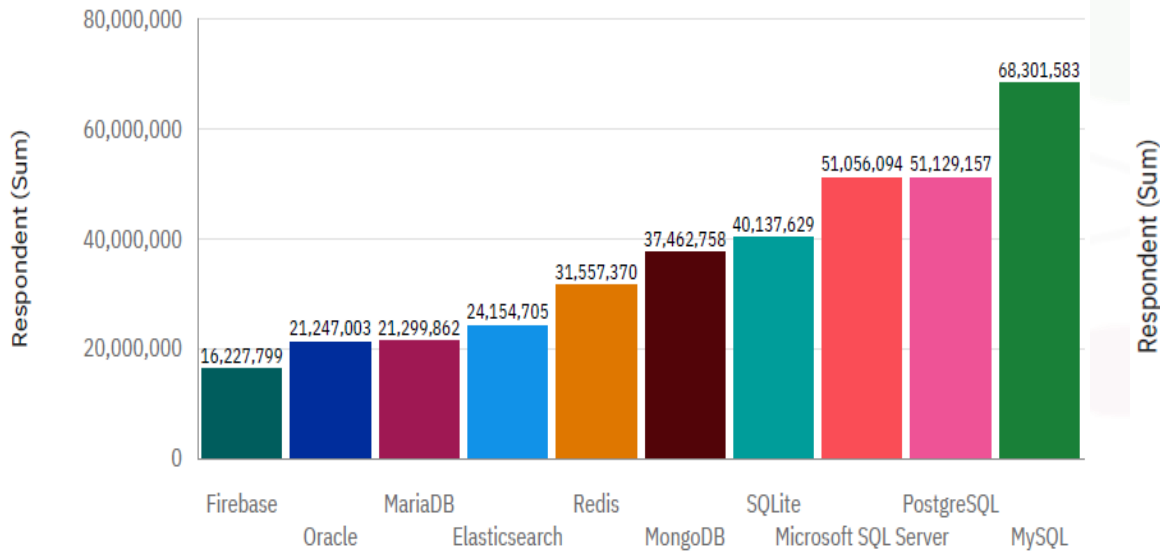

Implications

- Web development and data handling languages will keep in high demand in the future.
- C++ might fall out of the TOP 10 language next year.
- C# will almost keep the same in the next year.

DATABASE TRENDS

Current Year

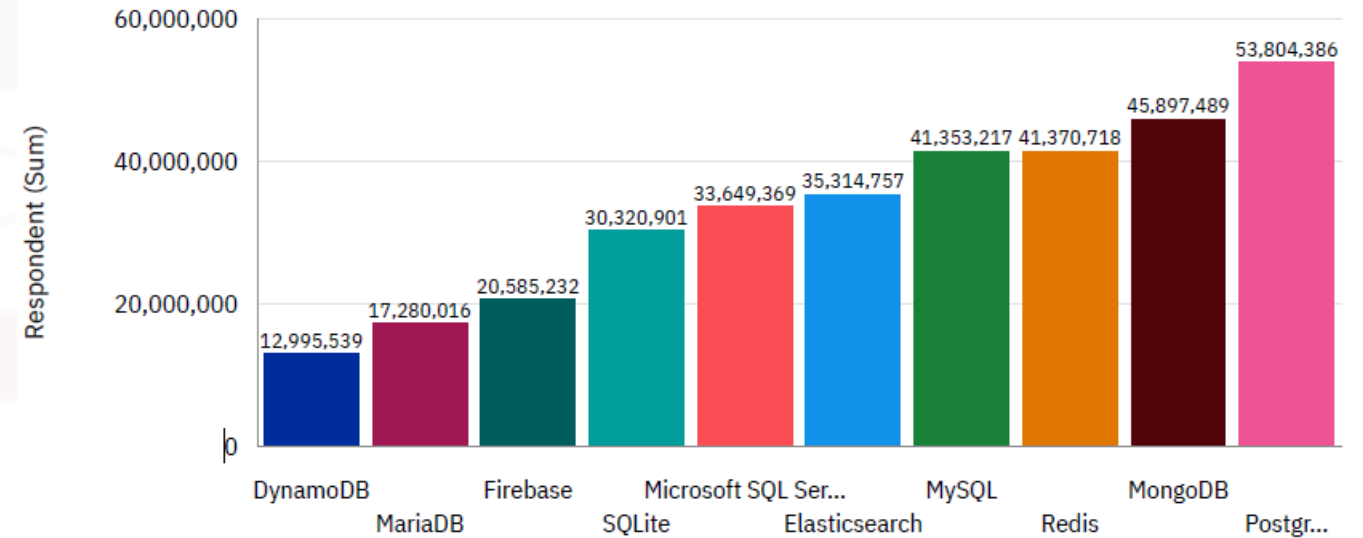

Top 10 DatabaseWorkedWith

DatabaseDesireNextYear

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL and PostgreSQL are the #1 and #2 Database in the market
- MS SQL and Sqlite are the less in demand.
- MongoDB as a non SQL database become more interesting to people

Implications

- PostgreSQL might become the most popular DMMS next year
- MongoDB may surpass MS SQL and MySQL to become the second-ranked DBMS. Means people are more interested in non SQL DBMS

DISCUSSION

- Technologies evolve rapidly.
- Keeping our knowledge updated is crucial to avoid being left behind
- Open source product become more popular in recent years.

OVERALL FINDINGS & IMPLICATIONS

Findings

- Javascript and Python will become most popular language.
- PostgreSQL and MongoDB will stay in the highest demand.
- React will go up to the #1 web framework position. Vue, Angular will be the less demand.
- In software development industry, 93.5% people are male while 6.5% people are female

Implications

- Get ready for the Non-SQL database.
- Software developers in undeveloped country.
- Help female more easy to get into software development industry

CONCLUSION

- The trends in IT industry is keep changing over time.
- People need to keep learning new technologies to avoid being left behind.
- More and more people are interested in non-SQL database.
- Open source cross platform language will be more popular.
